DETAILED ACTION

Information Disclosure Statement

1. The information disclosure statement filed 12/19/05 has been considered.

Priority

2. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Drawings

3. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the specifics of each of the independent claims (1, 5 and 7) as set forth computing a stability when the size of the synthetic acceleration vector becomes **equal** to a predetermined value a (a being greater to or equal to 0). must be shown or the feature(s) canceled from the claim(s). No new matter should be entered. It appears from figure 6 that this value is **smaller** not **equal** as claimed.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for

consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

- 4. The following is a quotation of the first paragraph of 35 U.S.C. 112:
 - The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.
- 5. Claims 1-9 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter, which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. Each of the independent claims (1, 5 and 7) set forth computing a stability when the size of the synthetic acceleration vector becomes **equal** to a predetermined value a (a being greater to or equal to 0). The written description (for example page 13 and the drawings figure 6) seem to indicate that computing a stability when the size of the synthetic acceleration vector becomes **less** than a predetermined value "a".
- Clarification/correction is required. Claims 2-4, 6 and 8-9 inherit the language of claims 1, 5 and 7 respectively.
- 6. The following is a quotation of the second paragraph of 35 U.S.C. 112:

Application/Control Number: 10/561,265

Art Unit: 2627

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Page 4

7. Claims 1-9 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1, line 21; claim 5, line 21 and claim 7, line 27 each set forth retrieving sizes of acceleration vectors that are stored in the storage section, however each of these claims previously set forth that the storage section only stores one vector not a plurality as set forth at the indicated claim locations. Claims 2-4, 6 and 8-9 inherit this language.

Allowable Subject Matter

- 8. Claims 1-9 are allowed over the prior art of record assuming the 35 U.S.C. 112 (first and second) paragraph rejections are overcome without changing the scope of the claims.
- 9. The following is a statement of reasons for the indication of allowable subject matter: The electronic appliance as set forth in claim 1, the reproduction apparatus as set forth in claim 7 and corresponding fall detection method of claim 5 that includes the specifics of the storage section, first stability computing section and second stability computing section and the fall determining section and corresponding steps of operation (claim 5) and their relationships are neither taught by nor an obvious variation of the art of record.

Conclusion

10. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Kobayashi et al. and Matsumoto, each having the same assignee

Art Unit: 2627

as the present invention, disclose sensors used for three-direction acceleration. Noda et al. having a filing date after applicant's uses an acceleration vector in a fall detection device.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Andrew L. Sniezek whose telephone number is 571-272-7563. The examiner can normally be reached on Mon.-Fri..

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Hoa Nguyen can be reached on 571-272-7579. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
